

## ***The Furntech-AFRDI Blue Tick***

# **Office Chairs Components List**

### Components Certified for use on Fixed Height and Height Adjustable Swivel Chairs

### ***Components Prequalified for AS/NZS 4438***

The Australian/New Zealand Standard for Adjustable Height Swivel Chairs (AS/NZS 4438) requires that mechanisms, gas springs, bases and castors show compliance with AFRDI Standard 109. The components listed below meet that requirement. In addition, the list includes office chair arms that have been certified to meet the requirements of AFRDI Standard 109.

### ***Certification Criteria***

The Institute has clearly defined certification criteria for various items of furniture and furniture components. These are continually being expanded to meet demand.

The criteria generally include requirements for:

- (i) strength
- (ii) durability
- (iii) stability
- (iv) function e.g. fitness for purpose (usually including ergonomic and basic safety criteria)
- (v) flammability (where appropriate)
- (vi) reasonable finish and workmanship

The performance criteria adopted for Certification are usually based on Australian and New Zealand standards, or AFRDI standards, or – where these are not available or relevant – on other well recognised standards, such as British, CEN, BIFMA or ASTM, for example. In some instances where none of these exist, we may develop a set of customised requirements. Whichever route to certification is taken each of the requirements listed above must be met to our satisfaction.

### ***Furntech-AFRDI Approved Products***

The suppliers of the listed products have undertaken to maintain quality standards, to advise Furntech-AFRDI of model changes and complaints and to accept a system of random audits.

**AFRDI Blue Tick Certification** requires that suppliers sign a certification agreement undertaking to maintain consistent quality of their products, to maintain a register of complaints, to notify the Institute of product changes, to have the products retested every three years and when standards change, and to submit to spot audits of product quality. Blue Tick Certification is open to all suppliers whose products meet the required standard and involves an annual licence fee to cover the cost of monitoring quality.

## Arms AFRDI Standard 109.8

The following fixed height/adjustable height arms have been tested and found to comply with the relevant requirements of AS/NZS 4438 when fitted to a rigid test frame. The performance of these arms when attached to a particular chair will depend on the strength of the anchor point, connections and brackets.
