

The Furntech-AFRDI Blue Tick Specialist Office Seating

Furntech-AFRDI Certified Products

The following product meets all of the strength, durability and stability requirements of AS/NZS 4438 *Height adjustable swivel chairs* but has some intentional variations from the Functional dimensions required in that Standard. Furntech-AFRDI makes no warranty about the suitability of this product for any particular user.

Certification Criteria

The Institute has clearly defined certification criteria for various items of furniture and furniture components. These are continually being expanded to meet demand.

The criteria generally include requirements for:

- (i) strength
- (ii) durability
- (iii) stability
- (iv) function e.g. fitness for purpose (usually including ergonomic and basic safety criteria)
- (v) flammability (where appropriate)
- (vi) reasonable finish and workmanship

The performance criteria adopted for Certification are usually based on Australian and New Zealand standards, or AFRDI standards, or – where these are not available or relevant – on other well recognised standards, such as British, CEN, BIFMA or ASTM, for example. In some instances where none of these exist, we may develop a set of customised requirements. Whichever route to certification is taken each of the requirements listed above must be met to our satisfaction.
